SCHRACK-Info

Patchcords for generic, structured network cabling systems. Support all applications requiring Class D to Class E (e.g. 1000Base-T, 100Base-TX, ATM) as well as VoIP, PoE. On the RJ45 connector of the LED patchcord, there are two contacts for the Patchfinder tool. By connecting the Patchfinder to the contacts, the boots at both ends of the LED patchcord start to light. Thus the patching is easily identified. During Light-functionality, Data-transmission remains stable and is not affected. Pin assignment 1:1.
